Serial No. 10/773,604
Response to Official Action

Remarks

In the Official Action of April 13, 2005, the Examiner has required Applicant to specify a single ultimate embodiment for prosecution and list those claims that read on the species that has been elected consonant with this requirement.

In response, Applicant elects the single embodiment of a prosthesis for implant in a human patient body comprising: at least one elastomeric envelope; a filling material contained in the elastomeric envelope; and a biologically compatible rupture indicator contained within the elastomeric envelope capable of leaking out of the envelope and causing a body change detectable to the patient, **wherein the rupture indicator is a dye causing a body change of a change in color of the urine.**

The claims that read on this species are claims 1-4, 7-10, 11-13, 15, and 20-24.

Applicant would like to direct the Examiner's attention to the Supplemental Information Disclosure Statement, including accompanying remarks, recently submitted in this application and is enclosing a copy of the I.D.S. and reference cited therein for submission, in case it has not yet reached the file by the time this Response does.

Respectfully submitted,
